

Sarthak Kadam

Full Stack Developer

Kalyan, Maharashtra, India | +91 77180 61474 | sarthakkadam147@gmail.com

GitHub: [venomhare](#) | LinkedIn: [sarthak00dev](#) | Twitter: [KadamSarthak](#)

Professional Summary

Full-stack TypeScript developer focused on AI SaaS and payment workflows. Built Gmail-integrated email tooling, wallet/payment apps, and open-source features using Next.js, Node.js, PostgreSQL, and LLM APIs.

Technical Skills

Frontend: React.js, Next.js, TypeScript

Backend: Node.js, Express.js

Databases: PostgreSQL, Supabase, MongoDB

DevOps & Tools: Docker, Git, GitHub Actions, Vercel, CI/CD, Nginx

Other Skills: REST APIs, Prisma/Drizzle ORM, Zod, TDD, JSON Schema

Open-Source Contributions

Open Source Contributor – VoltAgent ([GitHub](#))

- Integrated **Claude** model support using **Anthropic AI SDK (TypeScript)** ([Feature #10](#))
- Added **multi-modal** input support (images/files) for LLMs ([PR #110](#))
- Fixed **JSON Schema** → **Zod schema** parsing bug for better validation ([Issue #87](#))
- Participated in code review and issue discussion to align contributions with project requirements.

Projects

DraftMyMail AI | [draftmymail.com](#) | [Backend](#) | [Frontend](#)

Tech Stack: React (Vite), Bun JS, Hono, PostgreSQL, Supabase, Gemini API

- Built an AI SaaS that generates HTML email drafts and integrates with Gmail via Google OAuth and Gmail API.
- Optimized prompts and model selection to improve response quality and lower generation cost.
- Built user data storage and auth flows on Supabase/PostgreSQL for multi-user usage.

PowerPay Wallet | [powerpay.vercel.app](#) | [GitHub](#)

Tech Stack: Next.js, Express.js, Node.js, Postgres, JWT

- Built a digital wallet platform with Next.js, Express.js, and PostgreSQL, implementing wallet transactions, webhook handling, and balance updates with Prisma ORM and transactional consistency.
- Organized the app as a Turborepo monorepo with shared TypeScript packages, Docker support, and Zod-based validation.
- Implemented authentication with NextAuth, concurrency control for balance updates, and REST APIs for payment flows.

LGI Modz Showcase | [lgimodz.store](#)

Tech Stack: Next.js, TypeScript, Vercel, PayPal

- Developed a responsive product showcase site with customer support chat, image uploads, automated emails, and PayPal checkout integration.

Education

Bachelor of Science in Information Technology

KM Agrawal College, Kalyan

Mar 2024 – May 2026

Certifications & Courses

Cohort 2.0 – Full Stack & DevOps

100xDevs by Harkirat Singh | Oct 2024 – Jan 2025 | [Certificate](#)

Hands-on training in MERN stack, system design, and DevOps. Covered TypeScript, Next.js, Docker, Kubernetes, CI/CD, Redis and Kafka.
